Nagoya University is a comprehensive research university located in the Tokai region of Japan, a region known for its manufacturing and industry.

Originating from the Temporary Medical School and Public Hospital in 1871, Nagoya University was founded as an Imperial University in 1939, and then became a National University in 1949. Over the years, Nagoya University has fostered a free and open academic culture. This liberal environment played a crucial part in the success of the six faculty members honored with Nobel Prizes. Today, Nagoya University seeks to establish itself as one of the world’s leading research universities. We are dedicated to improving our education and research capabilities, as described in our mission statement below.

**Mission**

Nagoya University aspires to contribute to the wellbeing of society through the pursuit and production of novel and valuable research and education by upholding a free and open academic philosophy. Our mission is:

- To pursue truth and produce world-leading intellectual achievements through creative research.
- To cultivate courageous intellectuals who are endowed with the powers of critical thinking and imagination by implementing education that values initiative and self-motivation.
- To contribute to human welfare, cultural development, and global industry by spearheading academic research and cultivating individuals capable of exercising leadership in national and international arenas.
- To contribute to regional development by drawing on the unique qualities of the local community and engaging in multi-faceted and broad-ranging research activities.
- To promote international academic cooperation and the education of international students and to contribute to educational and cultural exchanges with other countries, especially those in Asia.
- As part of the Tokai National Higher Education and Research System, to continue to explore a new type of national university that is a "commons of knowledge and innovation".

---

**Nagoya University in Figures 2023**

16,000 Students

- 6,400 Graduate students
- 9,600 Undergraduate students

3,200 Faculty members

- 9 Undergraduate Schools
- 13 Graduate Schools

2,400 International students

6 Nobel laureates

8th in Times Higher Education (THE) Ranking of Japanese universities (2023)

129 billion yen

**Sources of Annual Revenue**

- Hospital: 32%
- Tuition: 7%
- Donation/Industry Collaboration: 25%
- Government: 25%
- Others: 9%

**Educational & Research Organizations**

**Undergraduate Schools**

- School of Humanities
- School of Education
- School of Law
- School of Economics
- School of Informatics
- School of Science
- School of Medicine
- School of Engineering
- School of Agricultural Sciences

**Graduate Schools**

- Graduate School of Humanities
- Graduate School of Education and Human Development
- Graduate School of Law
- Graduate School of Economics
- Graduate School of Informatics
- Graduate School of Science
- Graduate School of Medicine
- Graduate School of Engineering
- Graduate School of Biogeographical Sciences
- Graduate School of International Development
- Graduate School of Pharmaceuticals
- Graduate School of Environmental Studies

**Flagship Research Organizations**

- Center for Asian Legal Exchange (CALE)
- Institute for Advanced Research (IAR)
- Institute for Space-Earth Environmental Research (ISEE)
- Institute of Materials and Systems for Sustainability (IMaSS)
- Institute of Transformative Bio-Molecules (ITbM)
- Institute of Innovation for Future Society
- Integrated Research Consortium on Chemical Sciences (IRCCS)
- International Center for Research and Education in Agriculture (ICREA)
- Kobayashi-Maskawa Institute for the Origin of Particles and the Universe (KMI)
- Research Institute of Environmental Medicine (RIEM)

As part of the Tokai National Higher Education and Research System

- Institute for Glyco-core Research (iGCORE)
Researchers at Nagoya University endeavor to innovate and generate discoveries that will advance knowledge and benefit society. As a comprehensive university, we undertake research across a diverse range of subjects in Engineering, the Natural Sciences, the Humanities, and the Social Sciences. Our six priority research areas are:

- Biochemistry, Genetics & Molecular Biology
- Chemistry
- Physics & Space Science
- Earth Science
- Neuroscience & Immunology
- Botany & Zoology

Students and faculty using the open discussion and research space at the Kobayashi-Maskawa Institute

At ISAC (Engineering) working in a cleanroom (left) and a lab (right)

Yasuke Iwamoto (Engineering) using a high-velocity nitrogen jet

Students and faculty using the open discussion and research space at the Kobayashi-Maskawa Institute

The “Mix Lab” at iTbM, where researchers from different disciplines work alongside one another in finding cutting-edge solutions to contemporary issues

Researchers using an electron microscope to conduct fundamental research on nanomaterials

Researchers (Bioagricultural Sciences) collecting rice samples at the Nagoya University Farm

Ryuichiro Higashinaka (Informatics) and his students chat with android Shoko-san (on screen) and robots CommU and SOTA

Yasuhiro Miyaki (Law) in Nagoya University’s model courtroom

Ai Ueno (Engineering) testing a micro-device for use in spacecraft

Our Nobel Laureates

Six researchers from Nagoya University have been honored with Nobel Prizes, with four in Physics and two in Chemistry.

- Isamu Akasaki and Hiroshi Amano (2014, Physics) invented the blue LED, which enabled the creation of bright and energy-efficient white lighting.
- Makoto Kobayashi and Toshihide Maskawa (2008, Physics) discovered the origin of Broken Symmetry, which predicts the existence of at least three families of quarks.
- Osamu Shimomura (2008, Chemistry) discovered and developed the green fluorescent protein known as GFP.
Nagoya University engages in educational and research exchanges with universities and research institutes around the world. We now admit a greater number of international students and facilitate more student exchanges than ever before.

**Global Multi-Campus**

Nagoya University has a long history of international collaboration. We have 480 partner institutions in 61 countries or regions and 24 overseas offices. The Asian Satellite Campuses Institute (ASCI) and the Center for Asian Legal Exchange (CALE) represent our historical commitment to education and research in Asia. To strengthen our global presence, we established the Global Multi-Campus (GMC) in 2022. The GMC promotes cooperation with strategic partner universities from the Asia-Pacific region, North America, and Europe.

**The Global 30 International Programs**

The Global 30 (G30) International Programs are full-degree undergraduate and graduate programs taught in English. G30 students come from various international education backgrounds. No Japanese language proficiency is required at the time of enrollment.

**Joint Degree Programs**

A joint degree program (JDP) is a single degree program established in international collaboration between two or more universities. Partner universities jointly confer a single degree. Nagoya University offers JDP in partnership with several universities from around the world.

- Science: University of Edinburgh (Scotland)
- Medicine: University of Adelaide (Australia), Lund University (Sweden), and the University of Freiburg (Germany)
- Bioagricultural Sciences: Kasetsart University (Thailand) and the University of Western Australia (Australia)
- Engineering: Chulalongkorn University (Thailand)

**Membership in International Consortia**

Nagoya University promotes international exchange with universities and other institutions through its membership in the following consortia and collaborative networks:

- Association of Pacific Rim Universities (APRU)
- Japan Academic Network in Europe (JANET)
- Japanese University Network Bridging The Americas (JUNBA)
- MIRAI (collaboration between Japanese and Swedish universities)
- University-Based Institutes for Advanced Study (UBIAS)

**Asian Satellite Campuses Institute**

In 2014, Nagoya University established the Asian Satellite Campuses Institute (ASCI) as a core component of its international outreach initiatives. Since then, ASCI has opened satellite campuses in six countries - Cambodia, Vietnam, Mongolia, Uzbekistan, Laos, and the Philippines. Collaborating with six graduate schools at Nagoya University, ASCI coordinates the delivery of the Transnational Doctoral Programs for Leading Professionals in Asian Countries.

**COLLABORATION WITH INDUSTRY**

Nagoya University has a strong history of partnering with industry on research projects. These initiatives cover areas such as mobility, advanced materials, and energy. We have recently entered into partnerships with companies in the life sciences and quantum science. Our goal is to share knowledge with society by promoting open innovation and supporting startups. Through these collaborations, we endeavor to contribute to the creation of a more sustainable world.

**The City of Nagoya and Aichi Prefecture**

Nagoya has a population of around 2.3 million and is the capital of Aichi Prefecture. Aichi is home to an economic cluster of global companies in the automotive, aerospace, and robotics sectors. It is also home to the Port of Nagoya, Japan’s largest port in terms of both cargo volume and land area.
